ENERGY USAGE POLICY

The Institute is committed to sustainable development in all its endeavours. Within its ambit it envisages to streamline ways of energy conservation and utilisation through socially responsible ways.

Policy Statement:

The main objective behind the Energy usage Policy of the Institute is to manage energy in such a systematic way so as to minimize its impact on the environment. This energy policy is binding for all the components of the institution and applies to all its stakeholders and to the various activities undertaken by the institution.

The Institute strives to explore the renewable energy resources and to find out substitute natural resources as solutions to the energy crisis. This will help us to embed efficiency and environmental awareness into our everyday activities, thus helping us to realize our responsibilities and commitment to conservation of natural resources and to limit its usage. The energy policy will help us to embed efficiency and environmental awareness into our everyday activities, thus helping us to realize our responsibilities and commitment to conservation of natural resources and to limit its usage.

Objectives:

- To develop awareness about environmental issues.
- To understand one's responsibility towards energy conservation.
- To provide a pollution free healthy environment.

Plan of Implementation

The Institute is committed towards sustainable development in all its endeavours. In accordance following are the areas to be considered for streamlining ways and procedures for environment and energy conservation

- To install and use LED bulbs on campus to save energy.
- To install and use solar lights on campus.
- To invest in power efficient equipment.
- Use of natural lighting and ventilation is encouraged as and when possible.
- To take additional measures to continuously improve our energy consumption.
- To ensure the availability of necessary resources to achieve our objectives.
